deletedcookie.se/team/tobias

Game developer and technical leader with 14+ years of experience building and shipping games across PC, console, and mobile, including native Android, native iOS, and React Native products.

CORE EXPERTISE

Unity · C# · Java / Android · Swift / iOS · React Native · Gameplay systems · Behaviour AI · Technical direction · Tools & pipelines

PLATFORMS

PC & Steam Deck
PlayStation & Xbox
Nintendo Switch
Android & iOS

HOW I CONTRIBUTE

- Technical planning and architecture
- Hands-on gameplay programming
- Performance budgeting
- Cross-disciplinary collaboration
- Mentoring developers
- Technical risk assessment

PROFESSIONAL EXPERIENCE

Deleted Cookie AB · Co-Founder / Game Developer

2025 - Present

Co-founded an independent studio focused on original games, mobile products, and external development. Responsible for gameplay programming, technical architecture, prototyping, game design, and production workflows.

- **Plague Crew:** gameplay systems, networking, and technical development
- **Garden Sprites:** Android/iOS programming, game design, and release work
- **Mobile products:** Lasse's Cargo Shuffler and Tiny Space Racer

Thunderful / The Station · Technical Director

2019 - 2025

Led technical development and collaborated with Programming, Design, Art, QA, and Production. Worked on gameplay systems, agent behaviour, procedural generation, tools, optimization, and cross-platform development.

- **SteamWorld Build:** agent and enemy behaviour, action planning, workflows, performance budgets, and Switch partner coordination
- **ISLANDERS: New Shores:** procedural island generation, architecture, workflows, and platform performance

Prasius Entertainment · Co-Founder / Game Developer

2015 - 2019

Gameplay programming and PC/mobile development on Bloody Trapland 2 and TNT Kart.

- **Customer projects:** cross-platform product development in React Native

Number Twentyfive Entertainment · Co-Founder / Game Developer

2012 - 2015

Programming and game design across mobile titles StarCaptain, Pond, and Dragon Steve.

Selected technical work

Systems, tools, and cross-platform delivery

Tobias Kärrman
Deleted Cookie AB

I enjoy working at the intersection of technology and creativity, helping designers and artists turn ambitious ideas into scalable, performant game systems.

CONSULTING FOCUS

Hands-on development
Technical direction
Architecture & prototyping
Performance & ports
Embedded team support

SELECTED PRODUCTS

SteamWorld Build
ISLANDERS: New Shores
Plague Crew
Garden Sprites
Lasse's Cargo Shuffler
Tiny Space Racer
TNT Kart
StarCaptain

Native & cross-platform mobile development

Develops native Android applications in Java and native iOS applications in Swift. At Prasius Entertainment, developed cross-platform customer products in React Native. Experience includes architecture, platform integration, user-facing features, debugging, performance, testing, store preparation, and release.

Mobile game products · Deleted Cookie

Programming, game design, and product development for Garden Sprites, Lasse's Cargo Shuffler, and Tiny Space Racer across Android and iOS. Earlier mobile work includes TNT Kart, StarCaptain, Pond, and Dragon Steve.

Behaviour AI · SteamWorld Build

Developed agent and enemy behaviour using a simplified action-planning approach. Agents evaluated available actions and their current situations to determine appropriate behaviours.

Procedural generation · ISLANDERS: New Shores

Worked primarily on the island generation system, supporting procedural content creation and gameplay requirements across target platforms.

Tools & workflows · Thunderful / The Station

Created tools and designer-friendly, data-driven workflows, including pipelines that let teams configure game data in Google Sheets and import it into Unity.

Cross-platform optimization

Helped establish performance budgets and technical constraints for PC and console development, with particular attention to lower-spec platforms such as PlayStation 4 and Nintendo Switch.
